PROFESSIONAL SUMMARY

Computer Science engineering student focused on Unreal Engine 5 game development, with hands-on experience building and publishing a third-person action game. Experienced in implementing gameplay mechanics, enemy AI using Behavior Trees, combat systems, lock-on targeting, and cinematic sequences using Unreal Engine Blueprints. Passionate about developing engaging gameplay experiences and expanding expertise in gameplay programming and blueprints.

EXPERIENCE

- **AXR Research Lab** *April 2025 – July 2025*
  Intern as VR Developer GITAM University, Bengaluru
  - Developed interactive applications using C# and Unity, applying object-oriented programming principles and modular scripting.
  - Implemented and debugged gameplay logic, working with version control and performance improvements during development.

EDUCATION

- **Gandhi Institute of Technology and Management** *2022-present*
  Bachelor of Engineering, Computer Science Bengaluru
  - CGPA: 7.32
- **Sir M V PU college** *2020-2022*
  Pre-University Education Davanagere
  - Grade: 82.87%

PROJECTS

- **ECHOES OF TOMORROW – Third Person Action Game** *Jul 2026 – Oct 2026*
  Tools: Unreal Engine 5 | Blueprints | AI | Niagara [Itch.io]
  - Developed and published a third-person action game featuring combat, parrying, posture mechanics, enemy AI, lock-on targeting, and boss encounters.
  - Implemented enemy behaviour using Behaviour Trees and an attack-token system to coordinate enemy attacks.
  - Integrated gameplay UI, visual effects, animations, and cinematics, and packaged a playable Windows build.
- **Premium Automative Showcase** *Feb2026 – Mar2026*
  Tools: Unreal Engine 5 | Environment Design | Cinematic Animation
  - Created a premium garage/showroom environment to showcase a vehicle.
  - Produced cinematic sequences featuring the showroom, a vehicle reveal, and vehicle movement.

SKILLS

- **Technical Skills:**
- **Game Engine:** Unreal Engine 5, Unity
- **Unreal Development:** Blueprints, Gameplay Systems, Behavior Trees, Enemy AI, Combat Mechanics, UI
- **Programming Languages:** C++(Fundamentals) , Java
- **Game Development:** Animation Integration, Collision Systems, Level Design, Game Packaging
- **Core Concepts:** Object-Oriented Programming (OOP), Data Structures and Algorithms, Debugging
- **3D Tools:** Blender (Basic)

INVOLVEMENT

- **Adaptive Extended Reality Lab (AXR Lab)** *GITAM, Bengaluru*
  Contributed to AR/VR projects at AXR Research Lab through collaboration and prototyping under faculty guidance
  Volunteer: Volunteered at a Snap Workshop and Hackathon organized by IMSK.net at my college.

ACHIEVEMENTS

- **Smart India Hackathon:** finished Top 40/160 Teams *2023,2024*
- **Nexovate'25 National Level Hackathon:** secured 5/30 Teams *2025*
- **12-hours Code-da-thon :** finished 5th position *2024*
- **Hack zilla – 24 Hour Hackathon** 2025
